Application No.

Continuation of 11. does NOT place the application in condition for allowance because: in response to arguments regarding claims 17 and 18, clearly as stated by the applicant(s), the printer of Lamming prints the actual electronic document (see col.9, lines 10-27), therefore, since the portable device displays only a document icon, Lamming clearly teaches "a device to print information via the output terminal in more detail than the portable terminal". In response to the arguments regarding claims 1 and 9, specifically of an output controller that includes "the selecting device retrieving output terminal information from the storage device on the basis of the search data contained in the data print request and on the basis of a capability of the data format converting device so as to select an output terminal considered to be the best suited for the user of the portable terminal to receive provided output data", Boswell clearly teaches such limitations. Boswell teaches of a controller (see col.7, lines 54-57 and col.8, lines 32-43: "DEPCON") wherein the controller is capable of selecting device retrieving output terminal information from the storage device on the basis of the search data contained in the data print request (see col.13, lines 19-24 and col.14, line 62 thru col.15, line 14) and on the basis of a capability of the data format converting device (inherent: see col.2, lines 26-27 &56-58; col.3, lines 55-60; and col.7, line 66 thru col.8, line 3) so as to select an output terminal considered to be the best suited for the user of the portable terminal to receive provided output data (inherent: see col.2, lines 65-67).

Continuation of 13. Other: Rejection of claims 1 and 9 under 35 U.S.C. 112, 2nd paragraph has been withdrawn.
